

Simple Pump's Modular Deep Well Pump

SIMPLE
PUMP™

I

Operation Options

Both the hand and motor operated systems utilize the same pump head, drop pipes, and pump cylinder.

III

Manufacturer

The Simple Pump is made right here in the U.S.A so you get quality craftsmanship every time.

IV

Well Size

Our deep well pump can be easily installed in a 2-inch or larger well by itself.

Or the Simple Pump can be installed next to a submersible pump in a 4-inch or larger well.

II

Power Options

The Simple pump is modular and can easily be changed from a hand powered pump to motor operated in a matter of minutes!

V

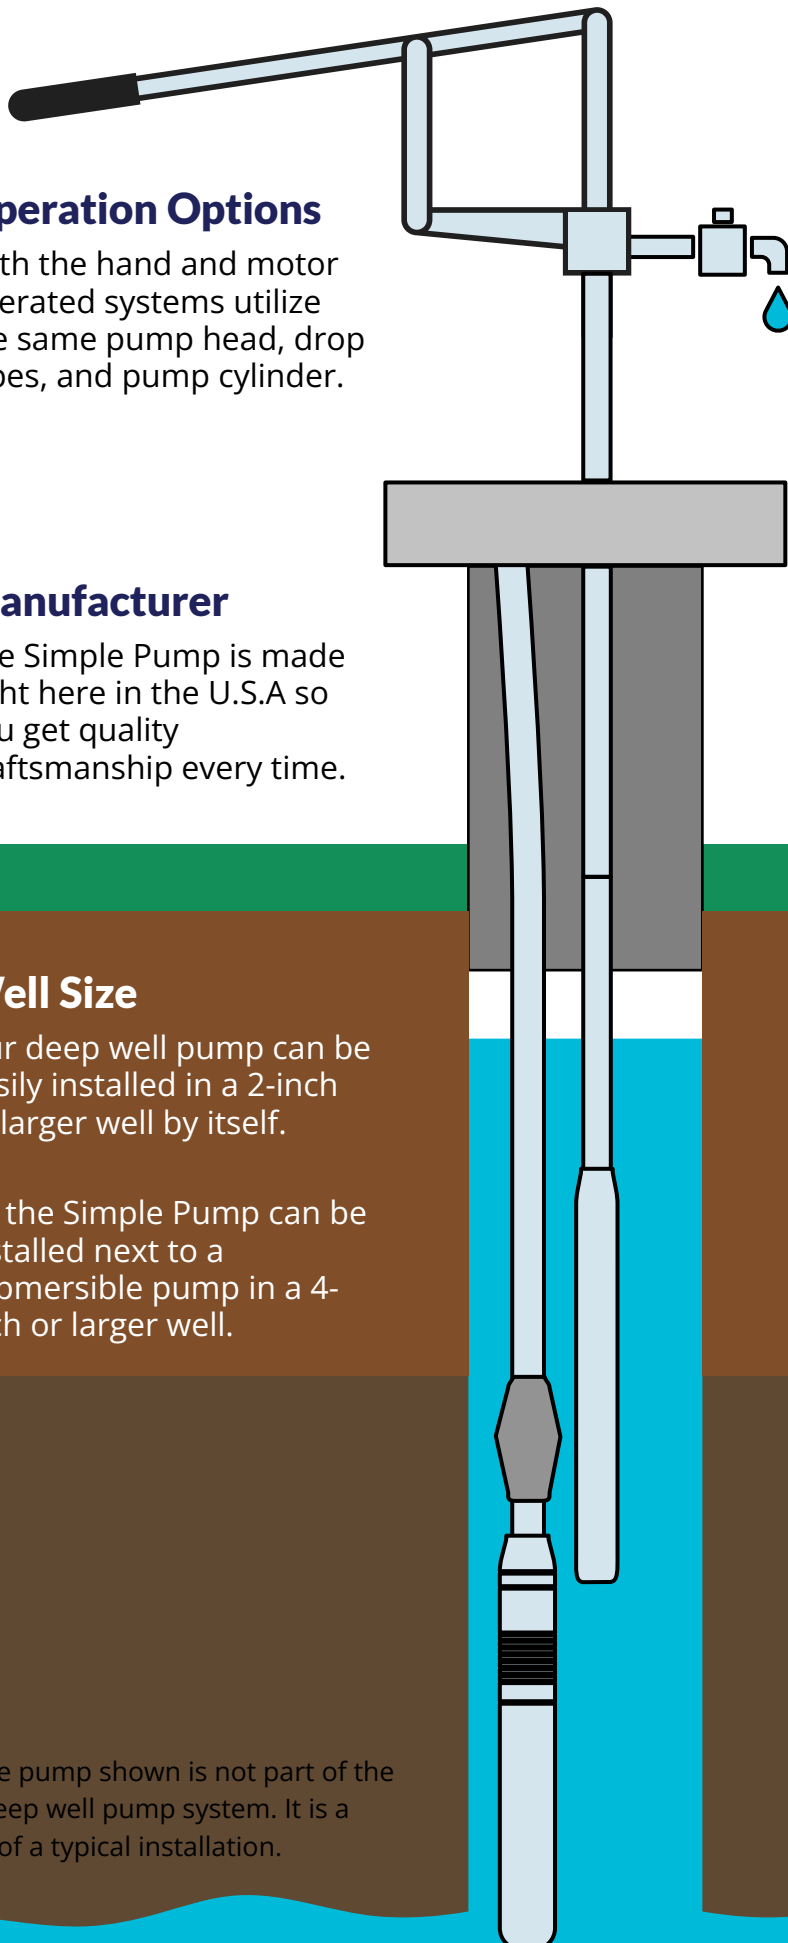

Warranty

All non-wear pump parts have a lifetime warranty so you always have peace of mind.

VI

Pump Depth

Our deep well pump supports a depth of up to 325 feet of static water with the pump cylinder maximum depth of 340 feet.

The submersible pump shown is not part of the Simple Pump deep well pump system. It is a representation of a typical installation.
